

MOTOR
INSURANCE

KEEPING TRACK
OF YOUR VEHICLE.

Hiscox. As good as our word

As a specialist motor insurer, we are able to offer expert support and a wide range of additional benefits including European motor assistance and our 24-hour, 365 day a year helpline so you can keep track of the status of your claim.

If your vehicle is stolen, we understand that you want to know everything possible is being done to recover it. That's why we have arranged a special discount for Hiscox motor clients with TRACKER, a leading stolen vehicle recovery system.

Introducing TRACKER

TRACKER is the only tracking system operated by all of the UK's police forces and has already helped recover more than 22,100 stolen vehicles worth more than £476 million and led to more than 2,330 arrests.

It provides tracking throughout the UK, France, Spain, Poland, Italy, Holland and Luxembourg.

How it works

A small tracking device will be hidden in your car by a TRACKER approved engineer. If your car is stolen, TRACKER will be alerted and in turn they will notify you of a possible theft. Once you contact the police and confirm to TRACKER that your vehicle has been stolen, your unit will be activated.

Police cars and helicopters can track the stolen vehicle using their on-board tracking computers, even if the vehicle is hidden in a garage, container or underground car park.

Once located, TRACKER will send a uniformed guard to wait with your vehicle and arrange for the recovery company to return your vehicle to you anywhere in mainland Great Britain.*

*Terms and conditions apply.

Choose the right tracking system for your car

There are a range of tracking options available and your broker will be able to advise you on which is the most appropriate for your vehicle and level of risk.

TRACKER Monitor

TRACKER Monitor operates using TRACKER's proven Very High Frequency (VHF) technology. If the vehicle is moved without the ignition turned on, the motion sensor will alert TRACKER.

TRACKER Locate

TRACKER Locate is a ground-breaking system combining VHF with GPS and mobile technology. An alert will be raised if there is any attempt to jam the communication system.

TRACKER Cat 5 Plus

TRACKER Cat 5 Plus uses both GPS and VHF technology. Driver tags are provided to identify that the driver of the vehicle is authorised. If a tag is not present when the vehicle is started, an alert will be generated and you will be contacted to confirm the vehicle's location. TRACKER Cat 5 Plus meets and exceeds the insurance requirements of the Thatcham Category 5 standard.

	Length of subscription†	TRACKER RRP unit and installation	Hiscox price for unit and installation	You save
Monitor 12	12 months	£361	£149	£212
